

TruckSafe Standards

TruckSafe Training Standards

C.1 Training (General).

The operator must implement a company training/education policy/procedure that includes the need for induction and ongoing training.

C.2 Training Needs Analysis.

That a process is in place to identify the on-going training/education requirements of the driver/s.

The process shall include the need to undertake a Training Needs Analysis (TNA) and then to seek and undertake appropriate training as a result.

C.3 Driver Road Use Requirements.

The operator will be accountable for ensuring that qualifications and license for drivers are current.
